PROJECTS

MyNoteBook

Minor project

Python full stack project using django

MyNoteBook is a simple web application developed using Python and the Django framework. It allows users to create, view, edit, and delete their personal notes online. The main purpose of this project is to help users manage their notes in an organized and secure way. This project also provides practical experience in web development and database management.

Shareit

Training project

Python full stack project using django

Share It is a web application developed for students to easily share and access study materials. It includes features like student registration, login, payment gateway, note sharing, viewing, and downloading notes. The platform helps students upload their notes and allows other students to view or download them in a simple and organized way.
